DETAILED ACTION

This communication is responsive to Amendment C, Filed 9/11/03.

Claims 9, 18 and 20-30 are pending in this application. In the Amendment A, claims 1-8 and 10-17 were cancelled, and claims 20-29 were added.

Claim Objections

The numbering of claims is not in accordance with 37 CFR 1.126 which requires the original numbering of the claims to be preserved throughout the prosecution. When claims are canceled, the remaining claims must not be renumbered. When new claims are presented, they must be numbered consecutively beginning with the number next following the highest numbered claims previously presented (whether entered or not).

Misnumbered claims 23-29 had been renumbered as 24-30.

Claim Rejections - 35 USC § 112

Claims 21-29 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. Claims 21-29 are dependent on the canceled claims.

The examiner assumes claims 21-24, and 26-29 are dependent on claim 20, and claim 25 is dependent on claim 24.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

Art Unit: 2174

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claims 20-30 are rejected under 35 U.S.C. 102(e) as being anticipated by Ferguson et al.
("Ferguson", U.S. Pat. No. 6,064,984).

Per claim 20, Ferguson teaches a method for providing a user interface to enable a user to make financial decisions by negotiating tradeoffs between personal financial goals, comprising:

- (a) displaying a plurality of images in a frame, each of the images representing a goal, wherein each goal includes at least one planned user expenditure (Figs.6 and 14; each image comprises of a plan event icon with one or more additional "arms" (elements 120a, 126, and 124 as shown in Fig. 6); col. 7, line 64-67);;
- (b) permitting a user to select from one of the images in the frame (col. 8, lines 47-51; col. 8, lines 60-64);;
- (c) displaying a plurality of preferences related to the goal represented by the selected image (fig. 7A-7D; col. 9, line 57-col. 10, line 10);
- (d) permitting the user to adjust at least one of the preferences (fig. 7A-7D; col. 8, lines 65-68; col. 9, line 57-col. 10, line 10); and
- (e) altering the appearance of one or more of the images in the frame based on the impact of the adjusted preferences (col. 9, lines 45-56; col. 10, lines 43-51).

Art Unit: 2174

Per claim 21, Ferguson teaches a method as recited in claim 20 further comprising:
requesting personal information on the user, receiving the requested personal information, and generating a personal profile corresponding to the adjusted preferences and the personal information (col. 10, lines 52-68).

Per claim 22, Ferguson teaches a method as recited in claim 20 further comprising:
displaying a selectable link to a personal profile frame, and displaying the personal profile within the personal profile frame upon selection of the link (figs. 8-13; col. 10, lines 52-68; col. 11, lines 30-40).

Per claim 23, Ferguson teaches a method as recited in claim 20 further comprising:
displaying a time indicia representing a time expectation for the amount of time expected for achieving one goal represented by the selected image, permitting the user to adjust the time indicia; and displaying the effect of the adjustment (col. 9, lines 25-35; col. 9, lines 57-col. 10, lines 6).

Per claim 24, Ferguson teaches a method as recited in claim 20 further comprising:
displaying a quality indicia representing a degree of quality for the goal represented by the selected image, permitting the user to adjust the quality indicia, and displaying the effect of the adjustment (col. 10, lines 38-51; col. 11, lines 41-61).

Per claim 25, Ferguson teaches a method as recited in claim 24 wherein an appearance of the selected image is altered in relation to the adjustment of the quality indicia with respect to quality for the goal (col. 9, lines 45-55; col. 10, lines 43-51).

Per claim 26, Ferguson teaches a method as recited in claim 20 further comprising:
displaying a degree of favoritism indicia representing the degree of favoritism between time and quality with respect to the goal represented by the selected image; and permitting the user to adjust degree of favoritism indicia (col. 10, lines 38-51; col. 11, lines 41-61).

Per claim 27, Ferguson teaches a method as recited in claim 20 further comprising:
displaying a selectable link to a financial assumptions frame, and upon selection of the link, displaying the financial assumptions frame populated by data representing financial assumptions (col. 10, lines 52-61; col. 11, lines 30-40).

Per claim 28, Ferguson teaches a method as recited in claim 20 further comprising:
displaying a summary of impacts on achieving the goals resulting from the adjusted preferences (col. 10, lines 52-62).

Per claim 29, Ferguson teaches a method as recited in claim 20 wherein the images representing goals include at least one of: a first image representing a horse goal, a second image representing a vehicle goal, a third image representing a monthly allowance and savings goal, a fourth image representing a planned furniture expenses goal, a fifth image representing a planned

appliance expenses goal, a sixth image representing a vacation goal, and a seventh image representing a children's education goal (col. 7, line 63- col. 8, line 6).

Claim 30 is rejected under the same rationale as claim 1.

Allowable Subject Matter

Claims 9 and 18 are allowed.

Response to Arguments

Applicants' arguments in the Amendment C have been fully considered but are not persuasive.

Applicant argued the following:

Ferguson does not teach "a frame wherein multiple images representing life events are displayed and the appearance of one or more images changes based on adjustment of preferences".

The examiner does not agree for the following reason:

Ferguson clearly teaches a frame wherein multiple images representing life events are displayed (See figs. 6 and 14; each image comprises of a plan event icon with one or more additional "arms" (elements 120a, 126, and 124 as shown in fig. 6); the plan event is further shown in col. 7 lines 64-col. 8, lines 6) and the appearance of one or more images changes based on adjustment of preferences (the appearance of one or more images changes as disclosed in col.

Art Unit: 2174

9, lines 45-56 when a user repositions the plan event icon as disclosed in col. 7, line 57-col. 10, line 6).
